Haseeb Ahmed Khan

Senior Software Engineer | Shopify App Developer | Laravel & React Expert | E-Commerce Solutions Specialist | Backend Engineer | API Integration

Lahore, Punjab, Pakistan

Summary

I am a Backend Developer and Shopify App Developer with 6+ years of experience in web application development, backend engineering, eCommerce solutions, and API integrations. I specialize in building scalable, secure, and high-performance applications using Laravel, PHP, Node.js, and modern JavaScript technologies.My core expertise lies in developing Shopify applications, designing RESTful APIs and GraphQL integrations, optimizing database performance, and building reliable backend architectures for complex eCommerce workflows. I also have hands-on experience with React.js, Inertia.js, Remix, Shopify Polaris, and Shopify App Extensions, allowing me to deliver end-to-end solutions that connect robust backend systems with intuitive user interfaces.Core ExpertiseBackend Development and API Engineering-> Laravel, PHP, Node.js, and backend application architecture-> RESTful API development, GraphQL, webhooks, and third-party API integrations-> MySQL and MongoDB database design, query optimization, and performance tuning-> Scalable application development, debugging, and production issue resolutionShopify App Development-> Custom Shopify public and private app development-> Shopify Admin API, GraphQL, webhooks, and app integrations-> Shopify Polaris, App Bridge, and Shopify App Extensions-> Shopify eCommerce workflows, platform integrations, and app functionality-> Remix and modern Shopify app architectureFrontend Development-> React.js, Inertia.js, and Remix-> Backend-driven user interfaces and API-connected applications-> Responsive interfaces and efficient frontend-backend integrationPerformance, Scalability, and Technical Leadership-> Database and backend performance optimization-> Building maintainable, reusable, and efficient codebases-> Technical problem-solving, code quality, and team collaboration-> Supporting developers and coordinating implementation when requiredThroughout my career, I have worked on complex web applications and eCommerce integrations,

focusing on reliable data synchronization, business logic, application performance, and scalable software architecture.I am interested in opportunities as a Senior Laravel Developer, Backend Engineer, Shopify App Developer, or Full-Stack Developer where I can contribute my technical expertise, solve challenging engineering problems, and help build reliable products.I am open to connecting with recruiters, engineering teams, and companies looking for experienced developers in Laravel, PHP, Node.js, Shopify app development, and eCommerce engineering.

Experience

MAKTA Solutions Kft.

Software Engineer

February 2026 - Present (9 months)

I work as a Software Engineer at MAKTA Solutions Ltd., specializing in Laravel development, backend engineering, eCommerce integrations, and scalable web applications. I deliver end-to-end solutions for complex engineering tickets, from technical discovery and root-cause analysis to implementation, automated testing, and production deployment.

Key Responsibilities and Contributions:

• Backend Development: Build and maintain scalable applications using Laravel, PHP, MySQL, and Node.js, focusing on clean code, reliability, and performance.
• eCommerce Integrations: Develop and maintain integrations with UNAS and Shoprenter, ensuring reliable synchronization of products, customers, orders, coupons, and promotions.
• API Development: Implement and troubleshoot REST APIs, GraphQL, webhooks, and third-party integrations to connect eCommerce platforms and backend systems.
• Database Engineering: Optimize SQL queries, improve data integrity, resolve duplicate records, and implement safe database migrations.
• Feature Development: Implement promotional campaigns, gift products, quantity-based discounts, loyalty programs, shipping calculations, coupon synchronization, and order processing.
• Problem Solving: Investigate production issues, identify root causes, resolve complex integration bugs, and improve application reliability.

• Testing and Deployment: Write automated tests, validate API behavior, investigate QA findings, and support releases across development, staging, and production environments.
• Technical Analysis: Translate business requirements into technical solutions, document findings, and improve existing application architecture.

Technologies: Laravel, PHP, MySQL, Node.js, JavaScript, REST APIs, GraphQL, Webhooks, UNAS, Shoprenter, Automated Testing, Database Optimization, and eCommerce Development.

Self Employed
Laravel Developer
February 2020 - Present (6 years 9 months)
Lahore, Punjab, Pakistan

As a freelance full-stack developer, I build scalable, high-performance web applications and custom Shopify solutions for businesses worldwide. With expertise in backend development, Shopify app creation, and modern frontend frameworks, I deliver robust and efficient digital solutions.
Backend Development – Build secure, scalable applications using Laravel & Node.js.
Shopify App Development – Develop custom Shopify apps, API integrations, and extensions.
Frontend Development – Create responsive UIs with React.js, Blade, and Polaris.
Database Management – Optimize MongoDB & MySQL for fast, reliable performance.
API Development – Design and manage REST & GraphQL APIs for seamless data flow.
Performance Optimization – Enhance speed, caching, and scalability for large applications.
POS & E-Commerce – Develop POS systems, marketplaces, and automated eCommerce solutions.
Third-Party Integrations – Integrate payment gateways, analytics, and automation tools.
Problem-Solving & Debugging – Identify, fix, and optimize complex code issues.
I specialize in custom Shopify apps, automation tools, and full-stack web development, helping businesses scale with efficient and innovative tech solutions.

SwishTag (Shopify Plus Agency)

2 years 9 months

Shopify App Team Lead

January 2026 - October 2026 (10 months)

Lahore, Punjab, Pakistan

Shopify App Team Lead – Led design, development, and maintenance of custom Shopify apps using Laravel, Inertia.js, and React, ensuring scalable and clean architecture.
API & Webhook Ownership – Architected and supervised GraphQL & REST APIs and webhook systems for reliable real-time data synchronization.
Embedded App Leadership – Directed implementation of Shopify Polaris & App Bridge, delivering consistent and high-quality embedded app experiences.
Backend & Database Strategy – Designed and optimized Laravel architecture, managing MongoDB & MySQL with performance and scalability in mind.
Performance & Integrations – Led performance optimization initiatives and oversaw integration of third-party services and platforms.
Agile Leadership & Quality Control – Guided the team in an Agile environment, conducted code reviews, mentored developers, and ensured timely bug fixes and stable releases.

Shopify App Developer

February 2024 - December 2025 (1 year 11 months)

Lahore, Punjab, Pakistan

Shopify Apps – Built and maintained custom apps using Laravel, Inertia.js, React.
APIs & Webhooks – Developed GraphQL, REST APIs, and webhooks for real-time sync.
Polaris & App Bridge – Created embedded app experiences with Shopify UI components.
Backend & Database – Optimized Laravel architecture, MongoDB, MySQL.
Performance & Integrations – Improved speed, integrated third-party services.
Agile & Bug Fixing – Ensured smooth operation in an Agile environment.

Focal Software, Inc.

Senior Software Engineer

June 2026 - September 2026 (4 months)

Lahore, Punjab, Pakistan

I worked on developing and enhancing accounting software using Laravel and PHP, focusing on backend functionality, business process automation, database management, and reliable application architecture.

Key Responsibilities and Contributions:

• Backend Development: Developed and maintained Laravel-based accounting software, implementing backend features and business logic to support business operations.
• Workflow Automation: Worked on automation rules and execution systems, including configurable triggers, actions, enablement settings, and automated task processing.
• Automation Management: Implemented database structures and backend logic for automation runs, execution statuses, target entities, JSON payloads, error messages, and execution timestamps.
• Database Engineering: Developed Laravel migrations, optimized database structures, and implemented appropriate indexes and constraints to maintain data integrity and efficient data access.
• Application Architecture: Built maintainable backend components and structured data workflows to support scalable application functionality.
• Debugging and Troubleshooting: Investigated backend issues, analyzed database behavior, and resolved technical problems across the application environment.
• Development Environment: Worked with Docker Compose, PHP, Laravel, and MariaDB to manage the local development environment and database services.

Technologies: Laravel, PHP, MySQL/MariaDB, Docker, Docker Compose, SQL, Database Migrations, Backend Development, Workflow Automation, and Business Process Automation.

Creative Sprout Media
Shopify App Team lead
July 2025 - March 2026 (9 months)
Lahore, Punjab, Pakistan

Technical Team Lead (Shopify Apps) – Led end-to-end development of custom Shopify applications using Laravel, Inertia.js, and React, from planning to production.

System Architecture & APIs – Defined technical architecture and led development of GraphQL, REST APIs, and webhooks to ensure secure and real-time data flow.
Shopify Ecosystem Expertise – Oversaw implementation of Shopify Polaris, App Bridge, OAuth, and embedded app standards for seamless merchant experiences.
Backend & Data Management – Took ownership of backend systems, optimizing Laravel performance, MySQL, and MongoDB for high-traffic apps.
Delivery, Performance & Integrations – Managed performance optimization, third-party integrations, and production stability across multiple apps.
Team Leadership & Agile Execution – Mentored developers, conducted code reviews, estimated tasks, and ensured on-time delivery in an Agile/Scrum environment.

DeadstockAPP®
Laravel Developer
February 2023 - January 2024 (1 year)
Multan, Punjab, Pakistan

Backend Development – Built a secure & scalable Laravel architecture.
Bidding System – Developed real-time bidding functionality.
API & Database – Created REST APIs, optimized MySQL performance.
Security & Performance – Implemented authentication, caching, and optimizations.
Integrations & Maintenance – Integrated payments, notifications, and ensured smooth operations.

Softsuite Technologies
Laravel Developer
June 2022 - January 2023 (8 months)
Multan District, Punjab, Pakistan

Developed POS systems, e-learning platforms, and social media apps using Laravel, React, and Blade.
Backend & API – Built scalable Laravel architectures & RESTful APIs.
Frontend – Developed React.js & Blade UIs for seamless UX.
POS & E-Learning – Created real-time POS & course management systems.
Integrations & Optimization – Improved performance, security, and database efficiency.

Enhanced expertise in Laravel, React & scalable systems.

Amzavenue
Laravel Developer
June 2021 - May 2022 (1 year)
Multan, Punjab, Pakistan

Worked on eCommerce and automation solutions using Laravel to streamline business operations.
Backend Development – Built scalable and secure Laravel applications.
API & Integrations – Developed RESTful APIs and integrated third-party services.
Database Management – Optimized MySQL queries for performance and efficiency.
Automation & Optimization – Implemented features to enhance workflow automation.
Gained expertise in Laravel, API development, and business automation.

Funzoft Pvt.Ltd
Junior Developer
January 2021 - May 2021 (5 months)
Multan, Punjab, Pakistan

Gained hands-on experience in game development, focusing on game mechanics, UI design, and performance optimization.
Game Development Basics – Learned core game development concepts and workflows.
Unity & C# – Explored Unity engine and C# scripting for game logic.
UI/UX for Games – Worked on interactive game interfaces and player experience.
Performance Optimization – Studied techniques to enhance game speed and efficiency.
Developed a strong foundation in game development and interactive applications.

Education

Bahauddin Zakariya University
Master's degree, Computer Science · (October 2018 - September 2020)
